Waste Containment System Design

OBJECTIVE

To provide attendees with an enhanced working knowledge of the state of practice relating to the proper selection, design and construction of geosynthetic materials being used in today’s landfill liner and final cover systems. Participants will be provided with latest information on emerging geosynthetic materials that will enhance the performance of landfill liner and final cover systems to meet both the State and Federal regulatory requirements.

This course has been uniquely formatted such that each technical presentation will be opened with a brief regulatory statement regarding the discussion topic advising the attendees of the primary regulatory concerns associated with each area of discussion.

WHO SHOULD ATTEND

Landfill design engineers, construction supervisors, landfill owners and operators, regulatory agency staff, and public works and municipal engineers will benefit from this Seminar.

ABOUT THE INSTRUCTORS

Principal instructor, Dr. Richard Brachman, P. Eng., was the recipient of six Best Paper Awards for works published in the Canadian Geotechnical Journal, Geotextiles and Geomembranes, and Geosynthetics International, and has been awarded the IGS Award from the International Geosynthetics Society. Dr. Brachman is also an active volunteer and the president-elect of the North American Geosynthetics Society.

Regulatory instructor, Robert Phaneuf, P.E., is the Assistant Director of New York State’s Department of Environmental Conservation’s Division of Materials Management and has worked in the field of solid waste management in a regulatory oversight role for over 38 years. Bob’s primary duties have included: formulation of statewide solid and hazardous waste management policy and regulation including supervision of technical and administrative evaluations of applications to construct and operate solid and hazardous waste management facilities throughout New York State. Since 1988, Bob has been a key member of the Division’s rule-making team for the State’s solid waste management regulations.
