Invisibility technologies: where are textiles?
By Janet Preus

Technologies seem to get attention in waves, depending on when there is a breakthrough development or when there is little that's new to report. The challenge with very new technologies is to predict with any accuracy how—much less when—it might be applied and what materials would be used to create a functioning product. Invisibility technologies certainly fit into this scenario, but the proposition is intriguing. [More]

MY TAKE

Just beginning to see the possibilities
The topic of invisibility technology is a little irresistible. Who isn't fascinated with the prospect of making things—or people—disappear? But that's not the only type of invisibility being researched
